

Check out the latest Funky Monkey updates!

*Turbo, Auto-Play mode + More*

**See What's new**

---

We're constantly working to improve your entertainment experience and we are pleased to announce the summary of what has changed.

## What's new

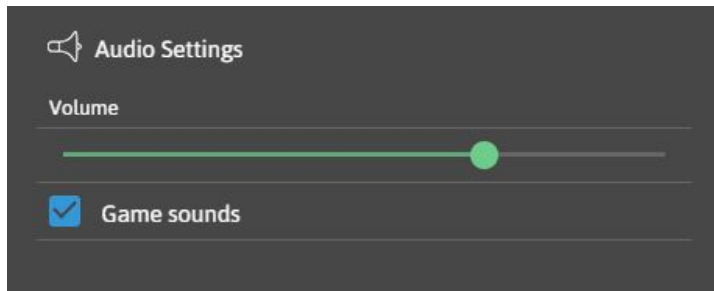

18/06/2020

### Improvements

- **Turbo mode for the mobile version.** More time for entertaining. Turbo mode skips reel spinning, so you see only the result of the spinning. Now for mobile!

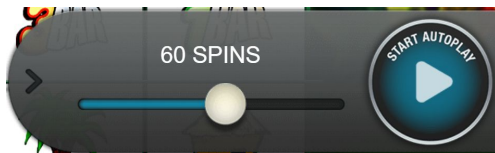

- **Volume of sound.** We've added the opportunity not only to turn on/off the sound. Set the comfortable level of volume with slider to feel much more pleasure of the game reality. Available in Options.

## New features

- **Auto-play mode.** Play and win even when you're literally not playing! Hold the Autoplay button to set the number of spins to play. Try it in couple with Turbo-mode.

- **Swipe the reel.** Spin the reel with swiping it. Feel the presence of reel. Choose what you like more- pressing the button or swiping the reel.
